

SEAMLESS & SECURE

ACCESS FOR YOUR REMOTE WORKERS

MITEL Connect Edge Gateway

The Mitel Connect Edge Gateway provides a secure remote worker solution that can be implemented today while readying us for tomorrow

The Mitel Connect Edge Gateway puts in place the tools you need today to quickly implement your work from home strategy should there be a second or third wave of Covid-19 or some other event in the future

Benefits

- Provides remote employees full access to all unified communications capabilities - conferencing, collaboration, instant messaging, Outlook integration, call management, and softphone with the same experience no matter where you're located.

Highlights

- All traffic to and from the Edge Gateway is encrypted
- Provides improved voice quality
- Supports browser-based apps for media communications and file sharing.
- Removes the complexity of securing remote endpoints, including the elimination of a VPN requirement.
